Mohit Yadav

"Computer science student specializing in MERN stack development. Passionate about applying full-stack development skills to real-world challenges. Seeking opportunities to contribute to innovative solutions, gain hands-on experience in the tech industry, and further enhance my skills.”

Projects

❖ **Study-Notion |** 📍 🔗 **|** Reactjs, Nodejs, MongoDB, Expressjs.

- Study-Notion is a comprehensive educational technology plateform that empowers users to create,consume, and evaluate educational materials.
- It is Develoed using modern technologies including Reactjs, Redux and Tailwind CSS for frontend and Nodejs, MongoDB, Expressjs for backend.
- Cloudinary is utilized for data storage.

❖ **Personal PortFolio |** 📍 🔗 **|** Reactjs, Threejs, Emailjs, TailwindCSS.

- My portfolio highlights expertise in 3D graphics, React development, Styling using Tailwind CSS and animations Utilizing Framer Motion.
- This project demonstrates the implementation of the React Components model and React Router Functionality.
- Additionally, the integration of EmailJS within the portfolio demonstrates my proficiency in utilizing third-part services to enhance functionality,enabling seamless communication and interaction with users via email.

❖ **Password Generator |** 📍 🔗 **|** Html, Css, Javascript.

- Successfully intergrates HTML CSS and JavaScript to develop a dynamic password generator, showcasing proficiency in frontend development.
- Implemented JavaScript logic to generate secure password based on user-defined parameters, enhancing data security and user experience.
- Utilized CSS for responsive design, ensuring seamless usability across different devices and screen sizes.

Achievements

- Solved 600+ DSA question on **Leetcode** and **GFG**.
- Participated in **20+ contests.**
- Secure an Internship at Bharat Intern.

Responsibilities

- **Core team member at GDSC, JEC:** Played a pivotal role in enhancing the technical skill set of club members through mentorship programs and skill-sharing initiatives.
